

Equature Viewpoint

Data Capture & Analytics

At the core of the Equature public safety software suite is the next generation recording system. Equature Viewpoint provides a solution to manage performance and information in your dispatch center to help you make better decisions on first responder assignments, asset deployment, and citizen safety.

Equature Viewpoint captures, manages and analyzes all next generation communications today. Its application platform is designed to comply with all future NENA i3 requirements and architecture changes as they are created. Public safety professionals using Equature Viewpoint see increased improvements to emergency preparedness and their agency's ability to respond and interactively manage events as they happen.

- ✓ Unlimited user access
- ✓ NG9-1-1 media capture (VoIP, RoIP, Video, etc.)
- ✓ Telecommunicator quality assessment
- ✓ Reports & statistics
- ✓ Speech transcription & full-text search
- ✓ Metadata capture (CAD, ANI/ALI)
- ✓ Built-in live-streaming and real-time location application.

Give your agency the tools they deserve!

Capture all
communications and
associated data.

Search 100% of
captured content,
including spoken
words.

Evaluate recorded
interactions
throughout the
organization and
intuitively act.

Don't take it from us.
See what our partners have to say!

Jude Warner - Spearfish PD, SD

"Whenever we had a question, Equature was able to help. Equature asked about us and what we needed and provided solutions accordingly rather than just showing us the product. The customer service has been great since!"

Rick Blackwell - Greenville County, SC

"We settled in on Equature a little over 2 years for our logging system after a very competitive RFP process, largely because we found Equature to be very forward-thinking insofar as NG9-1-1 developing standards are concerned."
