# Studio

powered by Equature

Equature Studio is a first-of-its-kind, artificial intelligence-powered redaction & transcription engine. Equature Studio provides real-time, automated redaction & transcription of both audio and video to help you remain in compliance with state and federal laws and regulations.

## What is FERPA?

The Family Educational Rights and Privacy Act (FERPA) provides parents with specific rights to view education records pertaining to their child, have records amended, and some control over the disclosure of personally identifiable information from the education records. FERPA requires that an educational agency or institution allow an individual parent of a student or the student (if eligible) to review video so long as the video directly pertains to the student.

## How Equature Can Help

Equature Studio integrates audio, video, and other education records with A.I.-based automated redaction services, transcription services, and advanced user capabilities. Equature provides a level of cost savings and time reduction for institutions tasked with redacting or transcribing records to remain in compliance with laws and regulations. With intuitive transcription services, Equature Studio makes it easy to find specific points in a video, redact necessary images, and obfuscate or redact portions of audio.

## Equature Studio is the first A.I.-powered redaction engine built for you.

Protect sensitive information with A.I. powered redaction and obfuscation.

Automate the process to save staff time and agency money.

Manually edit videos to redact specific objects or remove necessary redactions.

Notate and manage video easily within the application.

Export redacted videos and/or transcriptions for simple and fast sharing.

# Automated Redaction & FERPA Compliance
